

2021 State of Computer Science Education

Nationally, just 51% of high schools offer computer science, up from 35% in 2018. This represents tremendous progress by teachers, school leaders, policymakers, and other advocates. But given the significance of computing in today's society, it is not enough for half of schools to lack even a single course. New data reveals disparities in who has access to and who participates in computer science education.

Over the past year, U.S. students, teachers, and families faced unprecedented challenges, making it more important than ever that computer science becomes a sustained part of the education system. Computer science supports the development of problem solving, creativity, metacognition, spatial skills, reasoning skills, and improvements in reading, writing, mathematics, and science test scores. Increasingly, computer science is recognized as a core literacy for students.

Students who attend rural schools, urban schools, or schools with higher percentages of economically disadvantaged students are less likely to have access to computer science.

States are working to broaden access and participation in computer science with policies to make computer science a fundamental part of the K-12 education system.

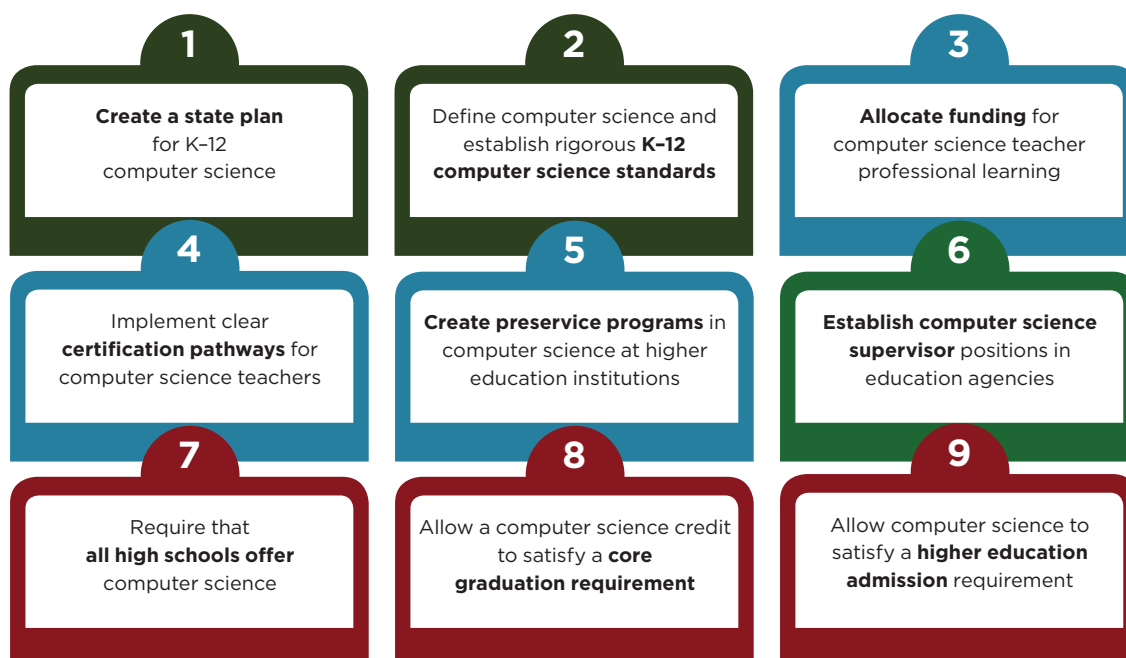

States that adopt **more of the nine policies** shown below have a greater percentage of high schools offering computer science.

Female students make up 49% of the elementary students enrolled in computer science, **44% of the middle school students**, and **only 31% of high school students**.

Although 78% of U.S. high school students attend a school that offers foundational computer science, **only 4.7% of students are enrolled in a course**.

Pursuing policies that expand access to K-12 computer science provides policymakers a rare opportunity to address equity, workforce, and education issues on a bipartisan basis.

Nine Policies to Make Computer Science Fundamental

Policy Principles

- Clarity**
- Capacity**
- Leadership**
- Sustainability**
- Equity and Diversity***

**Equity and Diversity should be incorporated in each of the nine policies.*

North Dakota

Percentage of Public High Schools Offering Foundational Computer Science

Participation in AP Computer Science by Demographic

71% of ND high school students attend a school that offers computer science, but only 3.9% of students are enrolled in a foundational computer science course. 17% of students enrolled in computer science courses are female. Of 112 total AP CS exams taken in North Dakota last year, 22% were female and 1% identified as another gender. Only three Black/African American students, three Hispanic/Latino/Latina/Latinx students, and one Native American/Alaskan student took an AP CS exam. No Native Hawaiian/Pacific Islander students took an AP CS exam.

North Dakota

State policy should provide clarity, school and state capacity, leadership, sustainability of computer science initiatives, and promote access to and equity within rigorous and engaging computer science courses.

Regional Comparison of Computer Science Education Policy Adoption

POLICY	ND	MT	SD	MN
State CS Plan	In progress			
K-12 CS Standards	✓	✓		
Funding for Teacher PD		\$32K		
Teacher Certification	✓	✓	✓	
Preservice Programs		✓		
State CS Supervisor				✓
All High Schools Offer				
Graduation Credit	✓	✓	✓	✓
Higher Ed Admission				

Percent of High Schools Offering CS by Region

North Dakota has averaged

1,608

open computing jobs each month

These open jobs have an average salary of

\$73,102

Yet there were only

152

graduates in computer science in 2018

Did you know...

71% of ND high school students attend a school that offers computer science.

Sources: The percent of high schools offering CS comes from the CS Access Report, open computing jobs come from the Conference Board, salaries come from the Bureau of Labor Statistics, and graduates come from the National Center for Education Statistics.

High Schools Offering Computer Science by State

In order to eliminate disparities in computer science education, **equitable participation** and **experience** for all students must grow in conjunction with access.
